UNLIMITED MARINE SERVICES, INC.

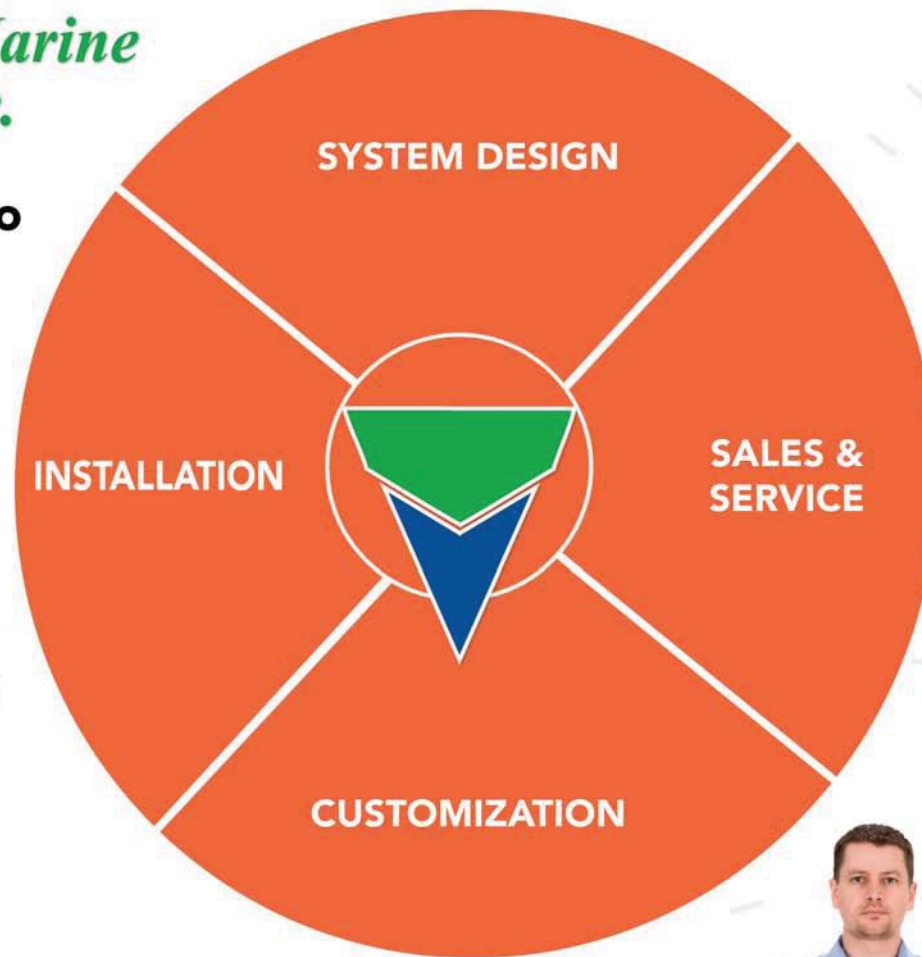

*Unlimited Marine
Services, Inc.*

**We have the capacity to
meet all your Marine
Technology needs:**

- Entertainment
- Navigation
- Communications
- Electrical

Unlimited Marine Services, Inc. (UMSI)
offers complete seamless vessel
integration to suit your entertainment,
navigation, communications and
electrical needs. Our service technicians
are experienced installers fully trained in
all the latest technologies.

If you demand the finest components
on your vessel, UMSI can design and
install the perfect system to suit your
marine needs.

ENTERTAINMENT

UMSI has integrated the Apple iPad to work seamlessly as your remote control for your entire vessel giving you fully automated control with simplicity. Call us for a live demonstration.

NAVIGATION

Insure the safety of your vessel with the latest in marine navigation systems. UMSI is a true innovator in marine electronics integration and maritime compliance. Protecting the safety of owners, passengers, crew and vessel is our primary goal.

COMMUNICATIONS

High speed data transfer has become an essential and expected part of every-day life. UMSI is a leader in design and implementation of these technologies from internet to security and all aspects in between. Communications is imperative in maritime safety and we will ensure your system meets all of the latest maritime compliance standards.

ELECTRICAL

Your Entertainment, Navigation and Communications systems will usually require additional electrical installation. Our ABYC certified technicians are experienced in design, installation and implementation of electrical systems. This eliminates the need of a costly sub contractor which keeps the project on budget and on time.

ENTERTAINMENT

When you demand the finest components in your entertainment system, Unlimited Marine Services, Inc. will design and install a custom entertainment platform. This will include the integration of your navigation system to satisfy even the most tech-savvy client with cutting edge technology. In today's high tech world you can control your entertainment system as well as navigation with the simple touch of a Crestron Remote or iPad. Our technicians are experienced in design, installation and service of these systems. Unlimited Marine Services, Inc. has on staff a certified Crestron programmer with master level skills able to customize any request - big or small. Our technicians are Crestron Digital Media Certified and the programmer is on staff not sub-contracted, meaning that in the future if changes are necessary from anywhere in the world we can make and implement the adjustment remotely. As proud authorized dealers for Crestron, Kaleidescape, Denon, James Loudspeakers, Extron to name a few, we have the capacity to equip your vessel with the latest technology and components in the marine industry.

Onboard navigation systems continue to evolve daily, UMSI stays ahead of this rapid growth by requiring continued education courses as a condition of employment for all of our technicians. These courses are provided directly by our manufacturers such as Furuno, Sperry, Anschutz and Transas so you know our technician's skills are current and accurate. This insures that you the customer will receive the finest service and support available worldwide. We continually strive to develop navigation systems that are user friendly no matter how complicated the system design. UMSI also provides continued support of your system even after the original sale and installation.

Discover the latest in helm design with our monitor matrix systems called "Touch and Slide". This monitor matrix allows the Captain to manipulate video sources on a Glass-Bridge Helm display with the touch, or slide of his finger. Contact us today and speak with one of our knowledgeable staff members about upgrading your existing navigation system or customizing your new build vessel.

COMMUNICATIONS

In today's world, the ability to transfer high-speed data is essential. Unlimited Marine Services, Inc. will design and install a system that can accommodate those demands with stability and reliability. The platforms we install include access via VPN tunnel technology which will allow our programmers and technicians to remotely service and repair your onboard network, computers and entertainment systems from our corporate offices in Fort Lauderdale, Florida. This also provides the ability for you to view your onboard vessel security and camera systems from any location in the world using your home pc, office pc, iPad or smart phone.

ELECTRICAL

Our ABYC certified technicians are fully qualified to install, integrate, troubleshoot and repair any marine electrical system. From something as simple as a switch to more technical shore power systems we are prepared, eliminating the need for an additional sub contractor for electrical service. This not only helps keep your project on schedule, but more importantly on budget. Whether it's inverters, chargers, galvanic isolation, hull issues or seamless shore power transfer, we will safely perform all work with the utmost care and professionalism.
